Art Unit: 2665

1. The disclosure is objected to because of the following informalities:

In the specification, it is confusing for reciting an **application** to perform functions of creating a socket or receiving raw packetized data from the socket since an application cannot initiate or run program or perform function by itself. Is it actually referring to an **application module or device**?

Appropriate correction throughout the entire disclosure, including the claims, is required.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 1-27 are rejected under 35 U.S.C. 102(a) as being anticipated by STEVENS et al. in the document entitled "TCP/IP Illustrated, The Implementation" (cited by the applicant).

STEVENS et al. in the document entitled "TCP/IP Illustrated, The Implementation" discloses a method, apparatus and a machine-readable medium comprising programming of: creating at least one socket by an application module, receiving raw packetized data by at least one mobile station protocol layer, transmitting raw packetized data from at least one mobile station protocol layer to the at least one socket, and transmitting raw packetized data from the at least one socket to the application module (see pages 1046 to 1065) as in claims 1-27.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2665

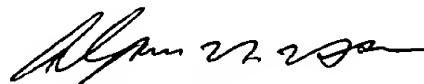

Gleeson et al., Bentley et al., Gooderum et al., Murphy et al. and Abrol et al. are all cited to show the common feature of data communication utilizing socket and protocol layers for packet transmission similar to the claimed invention.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alpus H. Hsu whose telephone number is (703)305-4377. The examiner can normally be reached on M-F (5:30-3:00) First Friday Off.
